Tamil Nadu: 300 Participants attend Digital Interaction in connection with International Bio Diversity Day

23.05.2020

About 300 participants from various states attended the unique Digital Interaction conducted by the Central Institute of Forest Genetics and Tree Breeding, Coimbatore, Tamil Nadu in connection with the International Bio Diversity Day.

The discussions centred on solutions in Nature befitting this year's Bio Diversity day theme. The significance of nature conservation against the background of Covid 19 pandemic was also discussed.

Dr Kannan Warriar, prominent environment scientist spoke on the traditional Forest Groves of Kerala which are unique examples of bio diversity conservation. Dr Senthil Kumar Director of the Institute of Forest Genetics and Plant Breeding released a special poster on the occasion.
